LEAGUE OF LEGENDS

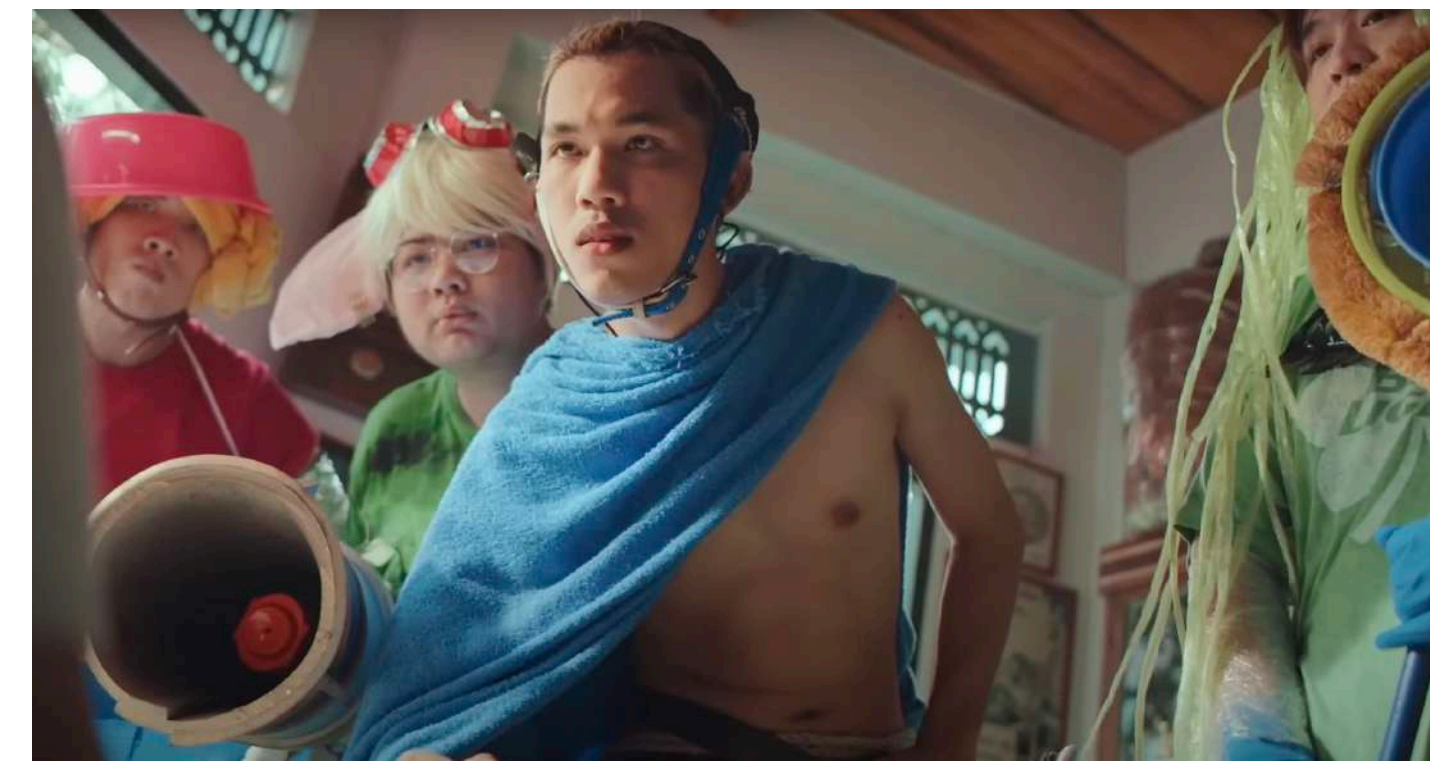

Riot Games adapted League of Legends: Wild Rift to celebrate the essence of Songkran, blending iconic 5v5 battles with the playful spirit of the festival. The campaign featured in-game “inside jokes” for fans and fun additions like the Khao Kai Giew power-up. It aimed to unite players of all ages, capturing the joy of a traditional Songkran water fight with humor and creativity, bringing lighthearted moments during the challenging times of COVID.

WISE

MONEY

Money is a source of emotions on a daily basis: stress, excitement, confusion, sometimes all at once. Whether it's paying for groceries or transferring a large sum, international financial systems add a layer of complexity. Having lived abroad and used Wise, I know the benefits of the platform: it simplifies financial exchanges where other issues such as language, travel or orientation can complicate life. The message is clear: 'Exchange money, anytime, anywhere', because when you're abroad, money shouldn't be a problem.

SCHOOL

This print campaign aims to raise awareness of harassment by drawing on quotes from famous French authors that address the impact of words and actions on the individual. By calling on well-known and respected literary icons, the campaign uses the power of literary culture to remind us that words can be just as hurtful as physical gestures. The aim is to raise awareness, especially among young people, by showing that harassment is not just a concrete act, but can also be hidden behind words, innuendo and behaviors that leave invisible after-effects.

TOUCH YOUR VAGINA NOT HER'S

The «Touch your ***, not hers» campaign, launched by the French association Fondation des Femmes Bénévolat, aims to denounce and prevent physical assault and sexual harassment of women in public spaces and on public transport. By directly confronting potential aggressors, the campaign emphasizes that such behavior is unacceptable and draws a clear line between what is tolerable and what is not. It also encourages victims to report these incidents and promotes societal support, fostering solidarity and mutual aid.

THE HUE PROJECT

The Hue Project is an artistic project that aims to explore and develop the use of gradients as a genuine visual language. Often perceived as simple graphic tools, gradients are here reinvented to express concepts and visual narratives. Using modern digital techniques, the project combines fluid colour transitions with geometric and abstract forms, creating harmonious and captivating compositions.
