# Table of Content

A collection of works from 2022  
encompassing both illustration and graphic design projects.

ARRIVE AT  
**KEY VISUAL** COLLECTION

I had the opportunity to work in graphic design within the marketing and advertising fields. My work primarily involved creating visuals for events held in shopping malls. For each event, I contributed by designing key visuals, which were then adapted for other related materials. collection of the work I have done during this time.

## About

I had the opportunity to work on motion graphics. Typically, I haven't done much work in motion graphics, as I primarily focused on animation projects during my studies. However, by applying my skills and constantly learning new things, I gradually improved in motion graphics. Here is a collection of the work I have done recently.
