**ANTI - WAR**

**DEEMO** is a rhythm game featuring soothing piano songs, the notes of which tell a heartwarming tale. Gameplay consists of tapping fast falling keys, to make the players feel as if they are behind an actual piano. This game developed by Taiwanese game developer Rayark. Producers of this game are Yu Ming-Yang, Chang Hsiang, Li Yung Ting

Yu Ming-Yang is CEO of Rayark. As a producer, Yu has developed a variety of titles as well as assisted in production line quality control and creative thinking. He insists on combining original game design with high-quality art as the cornerstone of Rayark's game development. At the same time, he also devotes himself to making Rayark a content provider that can influence the world.

**Why I like it?**  
This is a game about piano music. I like classical music played on the piano more than any other instrument, and it's a game designed to feel like playing a real piano, which I especially like. Including pictures drawn with beautiful lines that look luxurious and mysterious, along with the story of the game that makes it even more interesting.

**How does it affect my life?**  
This game is a game that has been out for many years, you can say that I grew up with this game. It made me very fond of listening to classical piano music. Because it is very melodious and it's a game, it makes me not bored to play and makes me listen to melodious songs from the game in my spare time as well.

**What does it benefit for?**  
For those who love classic, beautiful music that comes with a new rhythm game that doesn't have a rhythm box like other games. Magnificent visuals that will make you enjoy playing this game and the addictive storyline within the game.

Yu Ming-Yang (Director & Producer)
